

## What are the differences between Joomla!, Drupal, etc?

Common questions include "What is the difference between various Content Management Systems, such as Joomla!, Drupal, etc?", and "Which one is best for me?".

For a quick comparison of features, we recommend you visit <http://www.cmsmatrix.org/>.

An excellent way to get a feeling for how the different systems work is to try them out before you install them yourself (or hire someone to install them for you). Many open-source content management systems can be tried at <http://www.opensourcecms.org/>.
