

Deli/Store E-Commerce Site

A German/Austrian delicatessen and store had no web presence at all, but was interested in expanding to offer online product sales in addition to having basic contact information, menus, and some background on their family-run business.

To meet their needs, Kappa Computer Solutions, LLC created a web site including:

- A custom template
- Contact and location information
- Their various menus (kids, dining, catering, etc.)
- An history section with photographs of their old and current stores
- A complete e-commerce site with merchant services (credit card processing) for displaying and selling their merchandise over the Internet
