

PHP Script Software

Free PHP Script Software

As a web search for "php scripts" or "php software" will confirm, there are many sources of excellent PHP scripts, applications, and libraries. Here are some we recommend to get you started:

- PEAR, the PHP Extension and Application Repository
- PECL (another repository for extensions, along with a directory of known extensions and other resources)
- sourceforge.net, a large, general collection of open source software
- PHP at scripts.com
- PHP at hotscripts.com (software and other resources)

Our PHP Consulting Services We will be happy to help you with any of the following PHP-related services:

- Evaluate existing software to help determine what best meets your needs and to what degree
- Modify and enhance existing software that currently only partially meets your needs
- Installation and support
- Develop customized PHP script, application, or library software tailored to your requirements

- e-Commerce sites
- Mailing lists and auto-responders
- Content management systems
- Web logs ("blogs") and bulletin boards
- Groupware
- and much more
